(54) Title: METHODS AND COMPOSITIONS TARGETING TYROSINE KINASES FOR THE DIAGNOSIS AND TREATMENT OF OSTEOARTHRITIS

(57) Abstract: The invention discloses that members of a subfamily of receptor tyrosine kinases comprising TYRO3, Axl, cMer and ligands thereof, such as GAS6 are suitable targets for the development of new therapeutics to treat, prevent or ameliorate OA. The invention also relates to methods to treat and/or ameliorate OA and pharmaceutical compositions therefor comprising modulators with inhibitory effect on the expression or activity of members of this subfamily of receptor tyrosine and related ligands. The invention also relates to a method to identify compounds with therapeutic usefulness to treat OA, comprising identifying compounds that can, e.g., inhibit activity and/or expression of these polypeptides.

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This international Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. X Claims Nos.: 7-38 (in part) because they relate to subject matter not required to be searched by this Authority, namely:
Although claims 7-38 (due to the step of "detecting in a biological sample derived from the individual") can be equated to a diagnostic method practised on the human/animal body, the search has been carried out and based on the alleged effects of the compound/composition.
Claims Nos.: because they relate to parte of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box III Observations where unity of invention is lacking (Continuation of Item 3 of first sheet)
This international Searching Authority found multiple inventions in this international application, as follows:
·
As all required additional search fees were timely paid by the applicant, this international Search Report covers all searchable claims.
As all searchable dalms could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
No required additional search fees were timely paid by the applicant. Consequently, this international Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
The sad Files of accords (see warp concentration by the conficency protect
Remark on Protest The additional search fees were accompanied by the applicant's protest.
No protest accompanied the payment of additional search fees.
